

**Increase your cash flow**

**Decrease your old Accounts receivables**

**Recover valuable space in your facility**

**Maintain HIPAA compliance**

**Improve patient care**

- Are You ICD-10 Compliant?
- Does your current system do the job in collecting your receivables quickly and efficiently?
- If not, do you expect it to get better with the implementation of ICD-10?
- Are you tired of constantly losing money due to inadequate systems, processes, and workers?;

Horizon Healthcare Management Group, LLC

**Telephone: 240-513-6220**

## **Inundated with Past Due Claims?**

**Do you have enough accounts receivables, but not enough staff to work them?**

**Insurance carriers play the ‘pay-you-less, pay-you-later, or pay-you-not-at-all’ game. They hope that by rebuffing your requests for payment, you will eventually give up, allowing them to keep profits.**

**We don’t play that game, and neither should you.**

**Let us work to collect on your older claims.**

### **Recover aging receivables, instead of writing them off**

- Free up staff to concentrate on current A/R and other office tasks
- Provided that all regulations are complied with on your end, the insurance carriers owe you a debt. Treat your old claims as the debts they are.
- We host our own systems. Access your data whenever you want.
- Keep your existing billing system
- We know how to beat the insurance companies at their own game.
- Put our staff and resources to work for YOU.
