Digitize Your Records

Chart Scanning Services

Horizon Healthcare Management Group, LLC

Telephone: 240-513-6220

Migrating to an Electronic Health Record system is a major investment in making your practice operate more efficiently.

There is, however, the issue of the existing paper charts to consider.

Most often, the physician or office manager will assume that it's a simple process to scan the old charts into the EHR system. This can be a long, tedious, and expensive process for the practice to undertake.

Chart Scanning Services

We convert your paper charts into PDF documents.

Your choice of document management options:

- Import documents into your EHR system.
- Maintain documents on a CD
- Documents are hosted in a secure environment and available online at any time.

Your source documents are maintained securely.
